Devnix Technologies

Corporate Handbook & Employee Policy Manual

Welcome to Devnix Technologies

Welcome to Devnix Technologies! We are thrilled to have you join our team of innovators, thinkers, and creators. Established in 2026, Devnix Technologies was founded with a singular vision: to bridge the gap between complex technological challenges and elegant, scalable digital solutions.

Under the leadership of our Founder, **Himanshu Sharma**, we have quickly positioned ourselves as a forward-thinking agency specializing in AI development, SaaS products, and comprehensive software engineering. This manual serves as your guide to understanding who we are, how we operate, and the standards we hold ourselves to.

> **A Message from the Founder:**
> "At Devnix, we don't just write code; we build the future. Our strength lies in our people. I encourage you to take risks, innovate relentlessly, and collaborate openly. This handbook outlines the framework that allows us to thrive together." — *Himanshu Sharma*

Please read this document carefully. It contains vital information regarding our corporate policies, leave structures, code of conduct, and a detailed overview of the services we provide to our global clientele. It is designed to be your primary reference for all operational and administrative queries during your tenure with us.

Company Overview

Devnix Technologies is a premier technology solutions provider. We partner with startups, SMBs, and enterprise clients to digitalize their operations, leveraging the latest advancements in artificial intelligence and cloud computing.

2026	B2B & B2C	Global
YEAR FOUNDED	MARKET FOCUS	CLIENT REACH

Since our inception, our core philosophy has been agility. We recognize that the tech landscape evolves rapidly, and our organizational structure is designed to adapt, learn, and implement new frameworks seamlessly. Whether we are developing a bespoke SaaS platform or integrating a complex AI-driven RAG (Retrieval-Augmented Generation) assistant, quality and security remain at the forefront of our delivery pipeline.

Vision and Mission

Our Vision: To be the catalyst for digital transformation worldwide, empowering businesses through intuitive, intelligent, and scalable software solutions that redefine industry standards.

Our Mission: To deliver exceptional technological products by fostering a culture of continuous innovation. We strive to provide our clients with tailored AI models, robust SaaS architectures, and unmatched digital services, ensuring their long-term success in a competitive market.

Core Values

Our corporate culture is anchored by four fundamental values that dictate our interactions with clients, partners, and each other.

Innovation First

We embrace emerging technologies. From Generative AI to edge computing, we actively seek out new paradigms to solve old problems more efficiently.

Integrity

Transparency is non-negotiable. We maintain absolute honesty in our timelines, our code quality, and our communications.

Client-Centricity

Our success is measured by the success of our clients. We build solutions that address real business bottlenecks, not just technical novelties.

Continuous Learning

The tech industry waits for no one. We support and fund continuous education, certifications, and upskilling for all Devnix employees.

> **Culture of Inclusion:** We believe that the best ideas come from diverse teams. Devnix Technologies is committed to providing a discrimination-free environment where every voice is heard and respected.

Digital Services Overview

Devnix Technologies offers a comprehensive suite of digital services. We operate as a full-stack technology partner, taking ideas from conceptualization to deployment and maintenance. Our service portfolio is divided into three primary verticals: Custom Software, Artificial Intelligence, and Cloud/SaaS solutions.

Service Vertical	Core Offerings	Primary Technologies
Software Development	Web Apps, Mobile Apps, Enterprise Systems, API Integration	React, Node.js, Python, Flutter, Java
AI Development	RAG Assistants, Predictive Analytics, NLP, Computer Vision	OpenAI, TensorFlow, PyTorch, LangChain
SaaS Products	Multi-tenant Architectures, Subscription Management, Analytics	AWS, Stripe, PostgreSQL, Docker
Cloud & DevOps	CI/CD Pipelines, Cloud Migration, Infrastructure as Code	Kubernetes, Terraform, AWS, Azure

As a team member, understanding our breadth of services is crucial, regardless of your specific department. It allows us to identify cross-selling opportunities and provide holistic advice to our clients.

Detailed Service: Software Development

Software development is the foundational pillar of Devnix Technologies. We pride ourselves on writing clean, scalable, and highly performant code. Our engineering processes are strictly agile, utilizing two-week sprints and continuous integration pipelines.

Key Focus Areas:

- **Custom Enterprise Applications:** We build tailored ERP and CRM systems that map exactly to our clients' operational workflows, eliminating the bloat of off-the-shelf software.
- **Mobile Application Development:** Delivering seamless cross-platform native experiences for iOS and Android using modern frameworks like Flutter and React Native.
- **Web Applications:** From high-conversion e-commerce platforms to complex progressive web apps (PWAs), we ensure optimal load times and responsive design.
- **Legacy System Modernization:** We assist enterprises in migrating outdated monolithic systems into modern, microservices-based architectures.

> **Quality Assurance Standard:** All software delivered by Devnix undergoes rigorous automated and manual testing. Code reviews are mandatory, and zero critical vulnerabilities must be present prior to any production deployment.

Detailed Service: AI Development & RAG Systems

Established in an era where AI is revolutionizing business, Devnix Technologies is at the forefront of implementing practical, ROI-driven artificial intelligence solutions. We move beyond the hype to build robust AI infrastructures.

One of our flagship capabilities is the development of **Retrieval-Augmented Generation (RAG)** assistants. Like the very system utilizing this knowledge base, we build custom AI agents that securely ingest our clients' proprietary data—documents, databases, intranets—and provide highly accurate, context-aware responses to users, eliminating LLM hallucinations.

AI Capabilities Include:

- **Custom LLM Fine-tuning:** Adapting base models to understand industry-specific jargon and client-specific tones.
- **Natural Language Processing (NLP):** Automated document processing, sentiment analysis, and conversational chatbots.
- **Predictive Analytics:** Utilizing historical data to forecast trends, optimize supply chains, and predict customer churn.
- **Computer Vision:** Automated image inspection, facial recognition, and spatial analysis for manufacturing and retail.

Detailed Service: SaaS Products

In addition to client services, Devnix Technologies acts as an incubator for proprietary Software-as-a-Service (SaaS) products. We architect multi-tenant platforms capable of scaling securely to millions of users.

Our approach to SaaS development encompasses the entire product lifecycle. We don't just write the application code; we design the underlying subscription models, user onboarding flows, and automated billing integrations that make a SaaS business viable.

SaaS Engineering Pillars:

- **Multi-Tenant Architecture:** Ensuring strict data isolation between tenants while maintaining a single, easily updatable codebase.
- **High Availability:** Designing systems with 99.99% uptime guarantees, utilizing load balancing and multi-region database replication.
- **Billing & Provisioning:** Deep integration with payment gateways (Stripe, Braintree) for metered billing, tiered subscriptions, and automated feature gating.

Detailed Service: Cloud & DevOps Consultancy

Great software requires exceptional infrastructure. Devnix Technologies provides comprehensive Cloud and DevOps services to ensure that our applications—and those of our clients—are secure, scalable, and cost-efficient. We are cloud-agnostic, working across AWS, Google Cloud Platform (GCP), and Microsoft Azure.

We believe in "Infrastructure as Code" (IaC). Everything from server provisioning to network configuration is scripted, version-controlled, and automated. This reduces human error, speeds up deployment times, and allows for rapid disaster recovery.

Strategic IT Consultancy

Beyond hands-on development, Devnix offers high-level strategic consultancy. Under the guidance of our leadership team, including Himanshu Sharma, we assist enterprises in mapping out their digital transformation journeys. This includes technology stack audits, feasibility studies for AI integration, and long-term IT roadmap planning.

Company Rules and Regulations

To maintain a professional, productive, and safe environment, Devnix Technologies has established clear rules and regulations. All employees, contractors, and interns are expected to adhere strictly to this Code of Conduct.

Professional Conduct

- **Respectful Communication:** All communications, whether internal via Slack/Email or external with clients, must be professional, courteous, and prompt.
- **Punctuality:** Employees are expected to adhere to their designated working hours and be on time for all scheduled meetings.
- **Conflict of Interest:** Employees must not engage in external projects or freelance work that competes with Devnix Technologies' business interests without prior written approval.
- **Substance Abuse:** The use, possession, or distribution of illegal drugs or alcohol on company premises or during working hours is strictly prohibited and is grounds for immediate termination.

> **Compliance Notice:** Failure to adhere to the company's rules and regulations may result in disciplinary action, up to and including termination of employment.

Workplace Policies

Devnix Technologies is committed to fostering an inclusive and safe workplace. We operate strictly on merit and are proud to be an Equal Opportunity Employer.

Anti-Harassment and Anti-Discrimination

We maintain a zero-tolerance policy towards harassment or discrimination of any kind based on race, religion, gender, sexual orientation, age, disability, or marital status. This applies to all aspects of employment, including hiring, promotion, termination, compensation, and training.

If you witness or experience harassment, you are strongly encouraged to report it immediately to the HR department or directly to the executive team. All reports will be investigated promptly and confidentially.

Dress Code

Devnix maintains a "Smart Casual" dress code for daily operations. We believe in comfort conducive to productivity. However, when meeting with clients—whether virtually or in-person—employees are expected to present themselves in standard business professional attire.

Data Privacy & Security Policy

As a technology company handling proprietary AI models, source code, and sensitive client data, security is our highest priority. A breach of data security can cause irreparable harm to Devnix Technologies and our clients.

Confidentiality Agreement

Upon joining, all employees sign a Non-Disclosure Agreement (NDA). You are strictly prohibited from sharing client data, company source code, strategic plans, or financial information with any unauthorized third parties.

Security Protocols

- **Two-Factor Authentication (2FA):** Mandatory on all company accounts, emails, and repositories.
- **Device Security:** Company laptops must be encrypted, screen-locked when idle, and never left unattended in public spaces.
- **Public Wi-Fi:** Accessing company networks or client environments over unsecured public Wi-Fi is strictly prohibited unless routed through the official Devnix corporate VPN.

Working Hours & Attendance

Devnix Technologies operates in a fast-paced global market. While we value flexibility, maintaining core hours ensures team alignment and reliable client service.

Standard Working Hours: Our standard workweek is Monday through Friday, from 9:30 AM to 6:30 PM (Local Time), which includes a mandatory one-hour lunch break.

> **Hybrid/Remote Work Policy:** Depending on your role, Devnix supports a hybrid working model. Employees must be present in the office a minimum of 3 days a week. Fully remote positions are subject to specific management approval and strict performance metrics.

Attendance Tracking: Employees must log their attendance via the internal HR portal upon starting their workday. Any expected tardiness or emergency absence must be communicated to your direct manager via Slack before 9:30 AM.

Leave Policy: Annual Allotments

Devnix Technologies believes that adequate rest is essential for high performance and creativity. We offer a comprehensive leave structure designed to support our employees' health and work-life balance.

Leave Type	Annual Allotment (Days)	Accrual Method
Privilege/Earned Leave (PL)	18	1.5 days per month
Casual Leave (CL)	7	Credited annually on Jan 1
Sick/Medical Leave (SL)	7	Credited annually on Jan 1

Definitions

- **Privilege Leaves (PL):** Used for planned vacations. Must be applied for at least 14 days in advance. Unused PLs can be carried forward to the next calendar year (up to a maximum of 30 days).
- **Casual Leaves (CL):** Used for urgent, personal matters of short duration. Cannot be clubbed with PLs. Lapses at the end of the year.
- **Sick Leaves (SL):** Used in case of medical illness. A medical certificate from a registered practitioner is required for SL exceeding 3 consecutive days.

Leave Policy: Special Leaves & Holidays

Maternity and Paternity Leave

In accordance with statutory requirements, Devnix Technologies offers 26 weeks of paid Maternity Leave for female employees. We also offer 7 days of paid Paternity Leave for male employees, which must be availed within two months of the child's birth.

Bereavement Leave

Employees are entitled to up to 3 days of paid bereavement leave in the unfortunate event of the demise of an immediate family member (spouse, child, parent, or sibling).

Public Holidays

Devnix Technologies observes 10 mandatory public holidays per year. The specific holiday calendar is released by the HR department in December for the upcoming year, tailored slightly based on regional office locations.

> **Leave Application Process:** All leaves must be applied for and approved through the Devnix HRMS portal. Verbal approvals do not constitute official leave grants.

Compensation and Benefits

We strive to offer highly competitive compensation packages to attract and retain the best talent in the tech industry.

Salary Disbursement

Salaries are credited directly to employees' designated bank accounts on the last working day of every month. Pay slips are automatically generated and emailed to your secure corporate email address.

Health Insurance

Devnix provides comprehensive corporate health insurance coverage for all full-time employees. The policy covers the employee, their spouse, and up to two dependent children. Coverage details, including sum insured and network hospitals, are provided during onboarding.

Additional Perks

- **Internet Allowance:** A monthly stipend to cover high-speed internet costs for hybrid/remote workers.
- **Learning Budget:** An annual budget of up to $500 (or equivalent local currency) allocated for approved courses, AWS/Azure certifications, or professional tech conferences.

Performance Appraisals and Promotions

At Devnix Technologies, career growth is purely merit-based. We do not believe in tenure-based promotions; we reward impact, innovation, and leadership.

The Appraisal Cycle

We follow an annual appraisal cycle, culminating in April. The process involves:

1. **Self-Evaluation:** Employees reflect on their achievements, code quality contributions, project deliveries, and areas for improvement.
2. **Manager Evaluation:** Direct managers review performance against set KPIs, technical proficiency, and adherence to company values.
3. **1-on-1 Feedback Session:** A transparent discussion to set goals for the next year.

Mid-year check-ins are conducted in October to ensure employees are on track to meet their goals and to provide course-correction support if necessary. Exceptional performers may be eligible for mid-cycle out-of-turn promotions or spot bonuses at the discretion of the executive team.

Separation Policy and Notice Period

While we hope for a long and mutually beneficial relationship, we understand that professional paths may diverge. The following rules govern voluntary and involuntary separation from the company.

> **Mandatory Notice Period:** To ensure smooth project handovers and minimal disruption to our clients, Devnix enforces strict notice period policies depending on the employee's role and probation status.

Employment Status / Role	Required Notice Period
Employees on Probation	15 Days
Junior / Mid-Level Engineers	30 Days
Senior Engineers / Leads / Management	60 Days

Leave during Notice Period: Employees are generally not permitted to take Privilege Leaves during their notice period. Any unavoidable leaves taken will extend the notice period by an equivalent number of days.

Offboarding and Full & Final (F&F) Settlement

The offboarding process at Devnix Technologies is designed to be as organized and respectful as the onboarding process.

Clearance Process

Before the last working day, an exiting employee must obtain "No Dues" clearance from various departments:

- **IT Department:** Return of all company hardware (laptops, monitors) in working condition, and revocation of all software access and code repository rights.
- **Project Management:** Successful Knowledge Transfer (KT) and handover of all ongoing tasks and documentation.
- **Finance:** Clearance of any outstanding travel advances or corporate card dues.

F&F Settlement Timeline

Upon successful clearance, the Full and Final settlement (including payout of encashable accrued leaves and prorated salary) is processed within 45 days from the employee's last working date. The final relieving letter and experience certificate will be issued concurrently.

IT Assets & Equipment Policy

Devnix Technologies provides employees with the necessary hardware and software tools required to execute their roles effectively. These assets remain the exclusive property of Devnix Technologies.

Acceptable Use

Company-provided laptops and devices must be used strictly for business purposes. Installing unlicensed software, pirated media, or unauthorized cryptocurrency mining tools is a severe violation of policy.

Damage and Loss

Employees are expected to handle company assets with care. In the event of accidental damage or theft, it must be reported to the IT Helpdesk within 24 hours (accompanied by a police report in case of theft). Negligent damage may result in the cost of repair being recovered from the employee.

> **Monitoring:** Devnix Technologies reserves the right to audit and monitor all company-owned devices and networks to ensure compliance with security and acceptable use policies.

Handbook Acknowledgment

This Employee Handbook is intended to provide you with a general understanding of the personnel policies, services, and rules of Devnix Technologies. The policies outlined herein are subject to change at the sole discretion of the management. In the event of any policy update, employees will be notified via internal communication channels.

By signing below, I acknowledge that I have received, read, and understood the policies, rules, and guidelines outlined in this 20-page Corporate Handbook. I agree to abide by these policies during my employment with Devnix Technologies.

Employee Name & Signature	Date

For any HR queries or handbook clarifications, please contact hr@devnixtech.placeholder.com.
